RESET THE PURPOSE:
MAKE IT A MISSION...

“I WAS ADDICTED AND YOU HELPED ME RECOVER”

EDUCATE
ENLIGHTEN
EQUIP
ENGAGE
NEXT STEP
UNDERSTAND THE COMPLEXITY!
THE FOUR FACETS OF ADDICTION

- BIOLOGICAL
- PSYCHOLOGICAL
- SOCIALOGICAL
- SPIRITUAL
EMPOWERING FAITH-BASED & FAITH FRIENDLY CAPACITY

DON'T RE-INVENT RESEARCH

Exodus 4:2

The most common problem for those seeking help is not a lack of capacity of service providers but a lack of information ABOUT those service providers.

TIM ELLIOTT – RELINK.ORG
EMPOWERING FAITH-BASED & FAITH FRIENDLY CAPACITY

DON’T RECREATE
BEFORE YOU

COLLABORATE

“None of us, including me, ever do great things. But we can all do small things, with great love, and together we can do something wonderful.” – Mother Teresa
The goal is simple.

Take measures to create alignment and FLOW that will continuously improve the quality, speed, consistency and reliability of your services and operations.
FUTURE STATE:
HOLISTIC SYSTEM OF CARE

Use the collective impact framework to link together all care providers into one integrated system of care.

Public/Private hospitals and emergency service agencies

Houses of Worship/Faith Community Programs

Public health/community resources

<tr>
<td>Angie</td>
<td>35-year-old</td>
<td>Angel’s son overheard her talking about her struggles with prescription drugs. As an individual in recovery, she talked with Dr. veggie about getting treatment.</td>
<td>In an attempt to regain custody of her daughter, Angel attended a sub-acute detoxification program and was induced on medication-assisted treatment. At this point, her mother took temporary custody.</td>
<td>After completing her detox stay, Angel went to live with her mother in the next town and continued an intensive outpatient program (IOF).</td>
<td>Angel continued in an outpatient program, regularly attended NA meetings, and participated in parenting classes before successfully regaining custody of her daughter, Claire.</td>
<td>Wanting to give back, Angel became a sponsor for young mothers in recovery while also continuing to receive treatment.</td>
<td></td>
</tr>
<tr>
<td>Sudan</td>
<td>22-year-old</td>
<td>Sudanis a 22-year-old college student who smokes over his course load and frequents college. A friend introduced him to prescription drugs to help him relax and he’s now using them daily. It has made him feel anxious and uncertain about his future.</td>
<td>Sudan is a college student who is interested in an academic program that provides treatment for his substance use disorder.</td>
<td>While completing inpatient treatment, Sudan transitioned to a recovery house where he received support and encouragement from other sober men in the house and engaged in an employment readiness program.</td>
<td>Sudan continues to regularly attend NA meetings and serves as a mentor for other students working toward recovery. Sudan has completed the training process and has been offered a job as a peer recovery coach.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Devin</td>
<td>47-year-old</td>
<td>Devin is a 40-year-old construction worker who was let go from his job after his illicit drug use was discovered. After nearly a year of rehabs, Devin is now homeless.</td>
<td>Devin is a 47-year-old construction worker who was let go from his job after his illicit drug use was discovered. After nearly a year of rehabs, Devin is now homeless.</td>
<td>Devin is admitted to a sub-acute detoxification program for 90 days. The program included individual and group counseling and Devin continued on medication-assisted treatment.</td>
<td>While completing inpatient treatment, Devin transitioned to a recovery house where he received support and encouragement from other sober men in the house and engaged in an employment readiness program.</td>
<td>Devin continues to regularly attend NA meetings and serves as a mentor for other students working toward recovery. Devin has completed the training process and has been offered a job as a peer recovery coach.</td>
<td></td>
</tr>
<tr>
<td>Maria</td>
<td>48-year-old</td>
<td>Maria is a 48-year-old woman with adult children who are all on their own. Mary began using prescription drugs after a personal loss. She found the drugs made her feel less lonely. After two years of dealing with drug use, Mary decided she needed help.</td>
<td>Maria is a 48-year-old woman with adult children who are all on their own. Mary began using prescription drugs after a personal loss. She found the drugs made her feel less lonely. After two years of dealing with drug use, Mary decided she needed help.</td>
<td>Maria’s employer provided her with the time necessary to engage in IOF until she was ready to move on to an outpatient treatment program. She also worked with a peer recovery coach who helped her through treatment.</td>
<td>Maria’s employer allowed her to flex her schedule in order to attend regular NA meetings and call her recovery coach when necessary.</td>
<td>After 24 months, Maria is off of the medication-assisted treatment and is doing well in her work. Her recovery is strong and she continues to meet with her recovery coach and has become very involved with several community groups.</td>
<td></td>
</tr>
<tr>
<td>Chris</td>
<td>26-year-old</td>
<td>Chris is a 26-year-old athlete who turned to Xanax after his last injury. Chris was prescribed an opiate for the pain. Chris continued to use the pain medications long after the pain has healed and begins purchasing pills from a friend.</td>
<td>Chris is a 26-year-old athlete who turned to Xanax after his last injury. Chris was prescribed an opiate for the pain. Chris continued to use the pain medications long after the pain has healed and begins purchasing pills from a friend.</td>
<td>Chris returns home and continues in an outpatient treatment program. Simultaneously, Chris begins working with a faith-based peer support group.</td>
<td>Chris has become active in his faith community, helping others who are working to get on their path to recovery. Chris’s mission continues to worry about the possibility of another relapse.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Julie</td>
<td>20-year-old</td>
<td>Julie is a 20-year-old that abuses marijuana and drinks alcohol. At a party, a friend introduced her to heroin and she became hooked. On several occasions, Julie overdosed.</td>
<td>Julie is a 20-year-old that abuses marijuana and drinks alcohol. At a party, a friend introduced her to heroin and she became hooked. On several occasions, Julie overdosed.</td>
<td>Julie was transferred to a residential treatment program at which time she was diagnosed with depression. Julie began regular counseling sessions to address her addiction and depression.</td>
<td>Julie transfers to a recovery house where she begins attending NA meetings and finds a sponsor to support her through her recovery process.</td>
<td>Julie continues to struggle with her depression, but has been able to maintain her recovery with the help of medication-assisted treatment, her sponsor, and the support she finds at her recovery house.</td>

CREATING EFFECTIVE COMMUNITY REQUIRES...

EDUCATION

EVIDENCE BASED EQUIPPING

EXAMPLES OF EFFECTIVE ENGAGEMENT

EXCELLENCE OF EXECUTION!
EXPERIENCE CONNECTION

“The OPPOSITE of ADDICTION is CONNECTION”
– Dr. Alexander (RAT PARK)
IMPORTANT PASTORAL STEP!  
Change the LANGUAGE!  
Let’s DE-STIGMATIZE!

STIGMATIZING
- Addict, abuser, junkie
- Relapse
- “Dirty” vs. “Clean"
- Habit or drug habit
- Replacement or substitution therapy
- User

A person with a substance use disorder
- Recurrence
- Negative, positive, substance free
- Substance misuse disorder, active addiction
- Medication assisted treatment
- Person engaged in risky use of substances

  - FOSTERING FAMILY MINISTRY

GET CREATIVE!!!
“One of the best parts of being human is other humans. It's true, because life is hard; but people get to show up for one another, as God told us to, and we remember we are loved and seen and God is here and we are not alone. We can't deliver folks from their pits, but we can sure get in there with them until God does.”

— Jen Hatmaker
